1 Statement of Intent

The Policy Document has been amended in light of updated guidance on supporting students with medical conditions, drafted by the Department of Education for proprietors of Academies in England and effective from December 2015. This policy has been updated to reflect these changes.

The Federation believes that ensuring the health and welfare of staff, students and visitors is essential to the success of its Academies and Free Schools:

We are committed to:

- Ensuring that students with medical needs are properly supported so that they have full access to education, including school trips and physical education.
- Ensuring that no student is excluded unreasonably from any school activity because of his/her medical needs.
- Ensuring the needs of the individual are considered.
- Providing specialist training for staff.
- Ensuring students and parents are confident in the Academy ability to provide effective support to their child.
- Ensuring procedures for supporting students with medical needs are in place and reviewed at least annually.

We will:

- Ensure all staff are aware of this policy and that sufficient trained staff are available to implement the policy and deliver against all individual healthcare plans, including in contingency and emergency situations.
- Ensure that every Academy and Free School is appropriately insured and that staff are aware that they are insured to provide first aid and other medical support to students.

2 Introduction

Supporting students with medical needs is not the sole responsibility of one person. The Harris Federations' ability to effectively support students with medical needs will require the schools to work collectively with other agencies, the parents and students. Schools are encouraged to seek additional advice and information from a wider range of people if considered appropriate.

Students and young people with medical conditions are entitled to a full education and have the same rights of admission to school as other children. However, in line with safeguarding, a students' health should not be put at risk from for e.g. an infectious disease.

All schools should ensure that medical information is collected from all new students entering the academy so that the school can assist with the appropriate management of any medical condition or administration of medication.

3 Arrangements for Implementation of Policy

3.1 The Principal

The Principal is responsible for ensuring that:

- a) all staff are aware of the policy for supporting students with medical needs;
- b) that there are sufficient trained personnel to be able to support all the medical and healthcare needs of students and staff in the academy;
- c) a member of staff is appointed to have the lead role in ensuring students with medical conditions are identified and properly supported in the academy, and to support staff who are implementing a student's Health Care Plan.

3.2 Parents

To assist the academy/school in its fulfilment of the policy, parents are required to:

- a) Provide the school with sufficient information about their child's medical needs including updates
- b) Be involved in the development and drafting of Individual Health Care Plans e
Provide medication and equipment
- c) Ensure that they or another nominated adult are contactable at all times

3.3 Students

To assist the academy in its fulfilment of the policy, students are encouraged to:

- a) Be fully involved in discussions about their condition and how it affects them
- b) Contribute as much as possible to the development of their Individual Health Care Plan.

3.4 Academy Staff

Any member of academy staff may be required to provide support to students with medical conditions. Staff are therefore required to:

- a) Take into account the needs of students with medical conditions
- b) Know what to do and who to speak to if someone becomes unwell or needs assistance.
- c) If required, and having received the appropriate training, administer medication or support to students
- d) Attend training sessions as required to support students with medical needs.

3.5 Medical Lead

The Academy appointed Medical Lead is responsible for:

- a) Monitoring Medical and Individual Health Care Plans and students with medical conditions
- b) Assessing the training needs of staff
- c) Ensuring that suitable and sufficient training is provided to enable staff to administer medication and support where required.
- d) Arranging whole-Academy awareness training on supporting students with medical conditions
- e) To ensure the continued professional development of staff to enable them to fully support students.

3.6 School Nurses

Every Academy has access to school nurses, who are responsible for notifying the school when a child has been identified as having a medical condition which requires support. Nurses do not normally have an extensive role in schools, school nurses can however assist with the following:

- a) Advice on the appropriate support required.
- b) Provide support and liaison with outside agencies

3.7 Healthcare Professionals

Health Care professionals are responsible for notifying the Academy when a child has been diagnosed with a condition that requires support in school. Specialist Local Health Care Teams may be able to provide support with students who have been diagnosed with conditions such as diabetes, epilepsy etc.

Further advice on the roles of Local Authorities, Clinical Commissioning Groups, Providers of Health Services and Ofsted can be found on the following link:

<https://www.gov.uk/government/publications/supporting-pupils-at-school-with-medical-conditions--3>

4 Individual Health Care Plans (IHCP's)

Individual Health Care Plans (also sometimes referred to as Medical Care Plans) provide clarity to the school on what needs to be done for students with medical conditions and by whom. An Individual Health Care Plan will be prepared to help identify the necessary measures to support pupils with medical needs and ensure that they are not put at risk. IHCP's are often issued in cases where emergency intervention is required, or for medical conditions that require daily management, are complex and long-term, or for medical conditions which fluctuate. Not all children require an IHCP, it is for the parents, the students (where able), school and Healthcare Professionals to decide if a IHCP is necessary. Students with the same medical condition do not necessarily require the same treatment. Where treatment differs from the norm an IHCP should be written to support that student. (See Form 2 - Model Process for developing individual healthcare plans).

Some students have medical conditions that, if not properly managed, could limit their access to education.

Conditions include but are not limited to:

- Epilepsy;
- Asthma;
- Severe allergies, which may result in anaphylactic shock;
- Diabetes

Most students with special medical needs are able to attend the Academy regularly and, Academies will provide support to enable them to take part in all activities, unless evidence from a Clinician/GP states that this is not possible.

Each Academy will consider what reasonable adjustments it might make to enable students with special medical needs to participate fully and safely on Academy visits. A risk assessment for each trip will take into account any additional steps needed to ensure that students with special medical conditions are fully included.

Academies will not send students with medical needs home frequently or create unnecessary barriers to students participating in any aspect of Academy life; however, Academy staff may need to take extra care in supervising some activities to make sure that these students, and others, are not put at risk.

The Medical lead should ensure procedures are in place to manage transition from one school to another or on reintegration. Arrangements for support should be in place before the student starts. For students newly diagnosed with a medical condition; every effort should be made to ensure that arrangements are in place within two weeks. Finalisation and implementation of the ICHP rests with the school.

The school should ensure that when completing Individual Health Care Plans the following information[®] is recorded:-

1. The medical condition
2. Triggers, signs and symptoms
3. Allergies
4. Treatment required
5. Emergency Arrangements
 - a) Who to contact
 - b) Contingency arrangements
 - c) Personal Emergency Evacuation Plan (PEEP) required?
6. Resulting needs of the student
 - a) Medication (dosage, effects and storage, use of emergency inhaler?)
 - b) Other treatments
 - c) Is time required for student to recover/recoup?
 - d) Are additional facilities required
 - e) Is any additional equipment needed
 - f) Access to food/drink where this is used to manage their condition
 - g) Use of toileting facilities
 - h) Dietary requirements
 - i) Environmental (mobility/crowded areas/corridors)
7. Provision of support (by whom?)
 - a) Their training needs
 - b) Expectations of their role
 - c) Confirmation of proficiency by a health care professional
 - d) Cover if they are sick or absent
8. Who in the school needs to be aware of their condition
9. Arrangements and permission from parents for administration of medication

-
10. Arrangements for school trips/ out of school activities
 11. Confidentiality issues – designated individuals to be entrusted with information

All IHCP's should be reviewed annually, or sooner if there are any changes, and should be readily available to staff for quick reference, whilst preserving confidentiality.

5 Supporting Students with Medical Conditions on Educational Visits

Students with medical needs should not be excluded from educational visits of any type unless evidence from a clinician states participation is not possible.

Teachers organising and leading on school trips must be aware how a student's medical condition might impact their participation. The trip leader must consider what reasonable adjustments can be made to enable the student to participate fully and safely.

Students with medical needs should be included on the educational visit risk assessment, and where it is considered appropriate a separate risk assessment should be written to document specific arrangements, hazards, risks and the controls implemented.

Schools are required to carry spares of emergency medication on all school trips. This is especially important on residential school visits.

6 Staff Training

The type and training required to support students with specific medical needs will usually be determined during the development of the IHCP. In cases where care plans are already in place and additional training is required, the Medical Lead will be responsible for arranging the necessary training. It should be noted that a first aid certificate does not constitute appropriate training in supporting students with medical needs. Staff supporting students with medical needs must be appropriately trained and have confidence in their own ability.

7 Managing Medicines on Academy/School Premises

7.1 Storage and access

Each academy or Free School must designate a safe, lockable place to store students' medication and allocate a member of staff to control access. Where emergency medication is stored this should be manned at all times.

Students should be aware of the location of their medication at all times and where necessary be able to access their medication immediately.

Medication and devices such as asthma inhalers, blood glucose meters, adrenaline pens should always be readily available and not locked away. Students with asthma if they are able to manage their condition are encouraged to carry their inhaler. Spares of emergency medication should be readily available for use in case of loss or failure of the required device.

Any medication out of date or no longer required should be returned to the parents for safe disposal. When parents are asked to collect medication they should be advised that medication not collected within 1 month will be disposed of by the academy/school.

Medication not collected thereafter, should be returned to the academy/school's local pharmacy for safe controlled disposal. Sharps boxes should be used for disposal of needles and other sharps.

7.2 Administration of medication

Medication should only be administered at school when it would be detrimental to a student's health or school attendance not to do so.

Medicine, prescribed or not-prescribed should never be given to a child under 16 without the consent of their parents (see appendix 4). Only in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In cases such as this, every effort should be made to encourage the child or young person to involve their parents, whilst respecting their right to confidentiality.

Where possible and considered appropriate to do so, students should be allowed to carry their own medicines and relevant devices for self-medication. Students who self-manage and administer their own medication may require an appropriate level of supervision. If not appropriate relevant staff should assist with administration and manage procedures for them.

If a child refuses to take medication, staff should not force them to do so, but refer to the Individual Health Care Plan if they have one and contact the parents/carers so alternative options can be agreed.

Children under 16 should not be given medicine containing aspirin, unless prescribed by a doctor. For e.g. medication for pain relief should only be administered once previous doses are known and maximum doses have been checked. The academy/school should ensure that parents are made aware what has been given and when, to ensure maximum doses are not exceeded. Children under 12 should not be given Ibuprofen unless prescribed by a doctor.

Medication should only be accepted into the academy if:

- Medication is in date
- In its original container/box/bottle as dispensed by the pharmacist
- Named
- Includes instructions for administration, dosage and storage
- You have consent (Appendix 4)

The exception to this is Insulin, which must still be in date, although unlikely to be in its original container, but contained within an insulin pen or pump.

7.3 Short term or non-prescribed medication

Where medication or treatment is not part of a long term medical condition, but is only required for a finite period, for example the completion of a course of antibiotics, or for pain relief, the student's parents/carers will be required to sign a Parental Consent for the administration of medication or treatment form (Form 5).

7.4 Controlled Medication

A child who has been prescribed a controlled drug may legally have it in their possession if they are considered competent by the academy to do so. Passing that medication, however, to another student is an offence. It is therefore Harris' Policy that all controlled medication is secured on site in a secure non-portable container, with named staff given access. Controlled drugs should be easily accessible in an emergency. Controlled Medication on school trips should be held securely by the Lead First Aider.

Staff may administer a controlled drug to the child for whom it is prescribed. All controlled medication should be administered by staff in accordance with prescribed instructions. Records should be kept of any doses used and the amount of drug held. Schools are encouraged to count-in and count-out controlled medication. This list should be updated each time medication is taken or administered. (See Form 6: Record of regular medicine administered to an individual student). Parents should be notified when a controlled drug has been administered (Form 10)

7.5 Homeopathic Medication

Due to their active ingredients, homeopathic medicines cannot be administered by staff unless they are trained to do so.

7.6 Emergency Salbutamol Inhalers

Emergency Salbutamol inhalers should only be used by children who have been diagnosed with Asthma and prescribed with an inhaler, and where parental consent has been sought. Use of this inhaler is for use when the students prescribed inhaler is not available.

Emergency inhaler kits should include as a minimum:

- A Salbutamol metered dose inhaler
- At least two single-use plastic spacers compatible with the inhaler
- Instructions on using the inhaler and the spacer/chamber
- Instructions on cleaning and storing the inhaler
- Manufacturers information
- A checklist record of inhalers batch numbers and expiry date)
- Arrangements for replacing the inhaler
- List of children permitted to use the inhaler
- Record of salbutamol administered

Arrangements for storage and care of the emergency inhaler should be followed to ensure the inhaler is in working order and always ready for use and accessible.

The school must ensure:

1. Spacers and inhaler are checked regularly and noted to be preset and in working order.
2. Replacements inhalers and spaces are obtained when expiry dates of existing inhalers approach
3. They hold a register of students diagnosed with asthma (copies to be held with the emergency inhaler)
4. Have written parental consent for use of the emergency inhaler
5. Ensure staff are aware that only students where consent have been received can use the emergency inhaler.
6. The school have appropriate support and training for staff in the use of the emergency inhaler.
7. Staff keep a record of the use of the emergency inhaler
8. Parents are notified when the inhaler is used
9. Two staff are responsible for ensuring the above is followed.

To minimize cross-infection spacers should only be used once, whereas the inhaler, if cleaned can be re-used. Inhalers that may come into contact with blood should not be re-used but disposed of.

Further guidance can be found here:

<https://www.gov.uk/government/publications/emergency-asthma-inhalers-for-use-in-schools>

8 Record Keeping

The academy must keep a record of all medication administered, when and by whom. Any side effects of medication administered in school should also be noted and shared with the parents/carers. (Form 10).

Student medical records should be retained for 25 years from the DOB of the child.

9 Unacceptable Practice

All school staff should use their discretion and judge each case on its merits. It is generally not acceptable to:

- Prevent a student from accessing their medication as required
- Treat each child with the same conditions in the same way
- Ignore the views of a child or their parents, or medical opinion
- Send children home unnecessarily or prevent them from staying in school and participating in normal school activities, including lunch.
- If a child is ill, send them to the medical room unaccompanied or with someone unsuitable
- Penalize students for their attendance if absence is related to their medical condition.
- Prevent students from eating and drinking or taking toilet breaks whenever they need to, to manage their medical condition.

-
- Require parents to attend school to administer medication or provide medical support to their child, including toileting issues. No parent is required to leave or give up work because the academy is failing to support their child.
 - Prevent a student from participating, or creating necessary barriers to children in any aspect of school life, including school trips. For example, by requiring parents to attend school trips.

10 Academy Insurance Arrangements

All Academies are covered by public liability insurance policies which will indemnify staff against any claims against them arising from the administration of first aid or medicine in accordance with this policy

11 Complaints

Should parents/students be dissatisfied with the care and support provided by the Academy, they should contact the Academy in the first instance.

FORM 2 Contacting Emergency Services: Request for an Ambulance

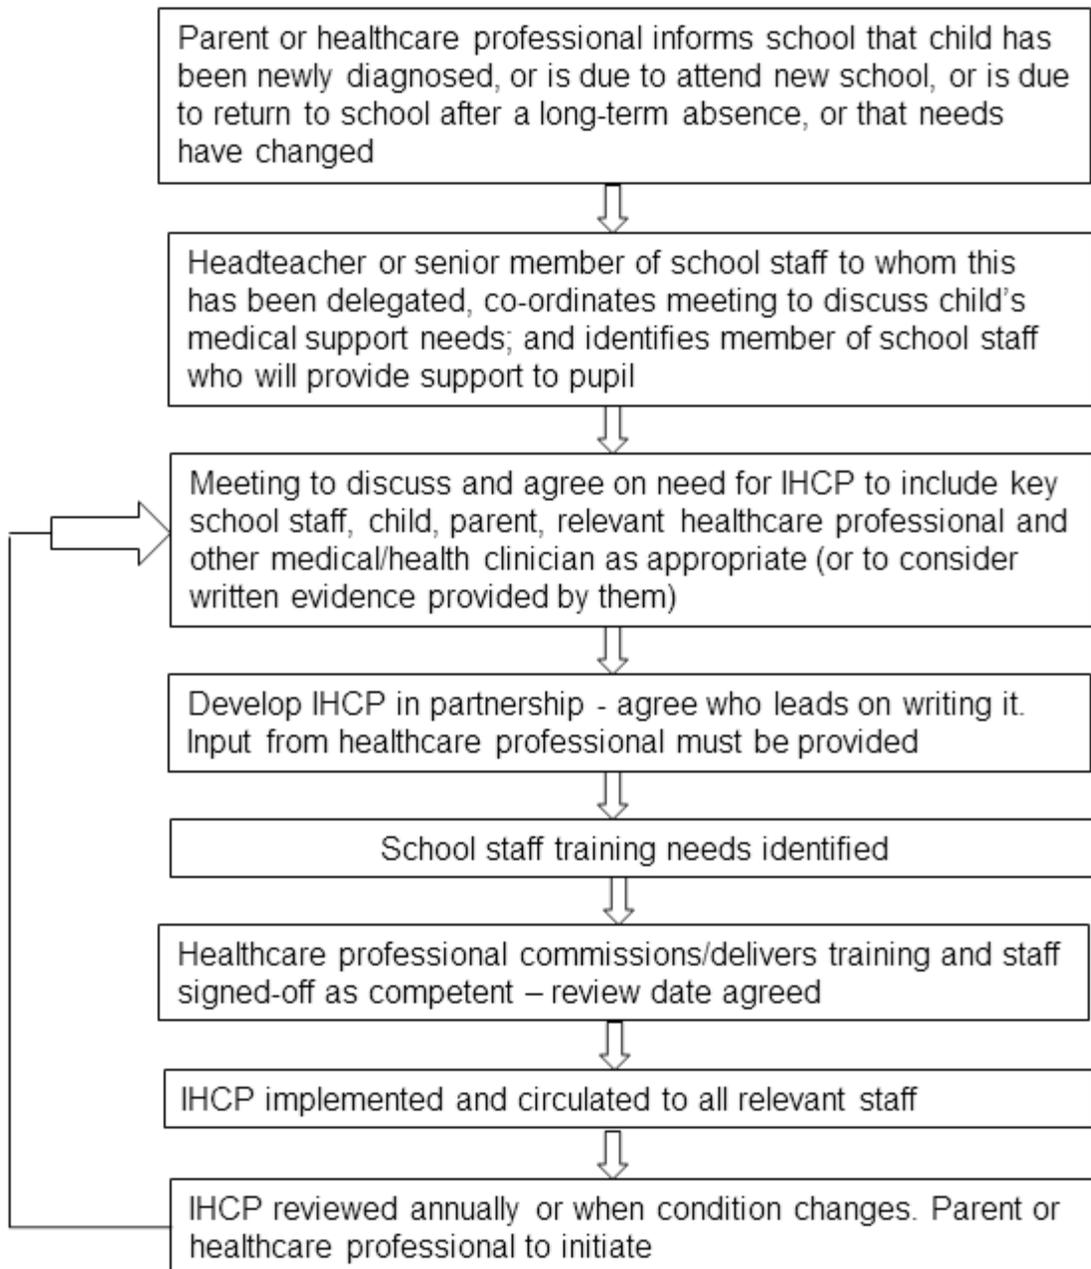

Dial 999, ask for ambulance and be ready with the following information:

1. Your telephone number: *(add in academy number)* _____
2. Give your location as follows *(insert school address)*

3. State that the postcode is: *(insert postcode)* _____
4. Give exact location in the Academy e.g *(Science Lab 3 or Sports Hall)*
5. Give your name
6. Give name of student and a brief description of student's symptoms
7. Inform Ambulance Control of the best entrance and state that the crew will be met and taken to the scene
8. Speak clearly and slowly and be ready to repeat information, if asked

Once sections 1, 2 and 3 are completed, copies of this form should be placed in the Central office, Student Information Centres and staff rooms.

FORM 3 Model Process for Developing Individual Health Care Plans (IHCP's)

FORM 4 Individual Student Health Care Plans (ICHP's)

Medication administration/storage arrangements.

Complete this section if students are required to take medication whilst on Academy premises or on an educational visit.

Medication name	Frequency of dose	Dosage
Will the student administer their own medication		Yes/No
If yes, will the student keep medicine/device with them or will it be kept in the Academy medical room/centre?		
If no, who is the nominated person to administer the medicine?		
Where will the medication be stored?		

FORM 4 (continued) - Individual Student Health Care Plan(IHCP)

Part 2 - Complete Part 2 only if medical care plan has not been received from clinic or hospital.

Describe medical condition, its triggers signs symptoms and treatment
Daily care requirements (eg before sport/at lunchtime) and the person(s) responsible for care (<i>must include deputy staff, in case of absence</i>)
Arrangements that will be made in relation to the child travelling to and from school. (<i>If the student has a life threatening condition, specific transport health care plans will be carried on vehicles</i>).
Procedures that will be put in place to support the pupil during school trips and activities outside normal Academy timetable (<i>e.g. risk assessments</i>)
Describe what constitutes an emergency for the student, and the action to take if this occurs
Follow up care required, if any:
Who is the responsible person to assist the student in an emergency (state if different for off-site activities). Name: Contact information: Alternative Contact Name and Contact Information:
Copies of forms supplied to...

FORM 4 (continued) - Individual Student Health Care Plan(IHCP)

Part 3

Complete for students where additional alternative monitoring /support and intervention is required, in addition to their medical needs, or for any Health and Social Care and Special Educational Needs, exam requirements, absence management.

Identified issues	Support provided	Staff involved	Further action required	Review Date
<i>(Outline current issues and consequences of these issues)</i>	<i>(Outline areas of support being given)</i>	<i>(with support /care)</i>	<i>(outline any additional support required)</i>	

This plan will be reviewed at least annually or earlier if the child’s needs change

FORM 5 Parental Agreement for Academy to Administer Medicine

The Academy will not administer or allow your child to take medicine unless you complete and sign this form.

Medication will only be accepted into the academy if:

1. Dispensed medication
 - is in its original container/box/bottle with a pharmacy label and students name
 - pharmacy label confirms dosage, administration and storage instructions
 - Parental agreement for academy to administer medicine has been received
2. Non - dispensed medication
 - It is in its original container/box/bottle and clearly labelled with students name
 - dosage and frequency instructions
 - parental agreement for academy to administer medicine has been received

If more than two medicines are to be given an additional form should be completed.

Name of student		DOB	
Medical condition or illness			

MEDICATION ONE

Name of medicine (<i>as described on container</i>)	
Date commenced	
Dosage, strength and method of administration	
Frequency of dose /time to be given	
Special precautions	
Side effects (If yes, please give details)	

MEDICATION TWO

Name of medicine (<i>as described on container</i>)	
Date commenced	
Dosage, strength and method of administration	
Frequency of dose /time to be given	
Special precautions	
Side effects (If yes, please give details)	

Self-administration?

Yes/No (delete as appropriate)

Procedures to take in an emergency _____

Name _____

D.O.B. _____

Initial medication prescribed: _____

Route to be given: _____

Usual presentation of seizures: _____

When to give medication: _____

Usual recovery from seizure: _____

Action to be taken if initial dose not effective: _____

This procedure is agreed with parents consent. Only staff trained to administer seizure medication will perform this procedure. All seizures requiring treatment in the Academy will be recorded. This procedure will be reviewed annually unless change of recommendations instructed sooner.

This information will not be locked away to ensure quick and easy access should it be required.

FORM 9 Emergency Instruction for an allergic reaction – EpiPen®

Student's Name: _____

DOB: _____

Allergic to: _____

<p>ASSESS THE SITUATION</p> <p>Send someone to get the emergency kit, which is kept in:</p> <p>_____</p> <p>.....</p>
--

IT IS IMPORTANT TO REALISE THAT THE STAGES DESCRIBED BELOW MAY MERGE INTO EACH OTHER RAPIDLY AS A REACTION DEVELOPS

MILD REACTION

- Generalised itching
- Mild swelling of lips or face
- Feeling unwell/Nausea
- Vomiting

ACTIONS

- Give _____ (antihistamine) immediately
- Monitor student until you are happy he/she has returned to normal.

SEVERE REACTION

- Difficulty breathing/choking/coughing
- Severe swelling of lips/eyes/face
- Pale/floppy
- Collapsed/unconscious

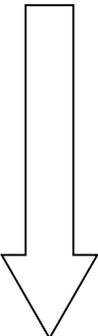

ACTIONS

1. Get _____ EpiPen® out and send someone to telephone 999 and tell the operator that the student is having an

FORM 7 (continued)

'ANAPHYLACTIC REACTION'

2. Sit or lay student on floor.

3. Take EpiPen® and remove grey safety cap.
4. Hold EpiPen® approximately 10cm away from outer thigh.
5. Swing and jab black tip of EpiPen® firmly into outer thigh. **MAKE SURE A CLICK IS HEARD AND HOLD IN PLACE FOR 10 SECONDS.**
6. Remain with the student until ambulance arrives.
7. Accompany the student to hospital in the ambulance.
